# Coal Crusher (5 No.)

Single Disc - Fine Coal Disintegrator

## AT A GLANCE

A single disc coal crusher that pulverises coal to below 2 mm for coke oven and boiler feed. Six manganese steel hammers run inside a 12 mm fabricated body, and the extra-wide disc keeps the output size uniform across the full 8 - 10 TPH range.

## KEY SPECIFICATIONS

CAPACITY  
**8 - 10 TPH**

MOTOR POWER  
**80 - 120 HP**

OUTPUT SIZE  
**< 2 mm**

MAX FEED SIZE  
**Up to 125mm**

## SPECIFICATIONS

|                   |                                |
|-------------------|--------------------------------|
| Crushing Capacity | <b>8 - 10 Tons / Hour</b>      |
| Motor             | <b>80 - 120 H.P.</b>           |
| Input Feed Size   | <b>Up to 125 mm</b>            |
| Output Size       | <b>Below 2 mm</b>              |
| Hammers           | <b>6 Nos., Manganese Steel</b> |
| Body Thickness    | <b>12 mm Fabricated Steel</b>  |

## DESIGN & DURABILITY

- ✓ Manganese steel side and top liner jaw plates
- ✓ Double row spherical roller bearings
- ✓ Single-side easy feeding mouth
- ✓ Extra-wide disc for uniform output
- ✓ Hammers replaceable through the side access door

## BUYING INFORMATION

|                      |                                                                          |
|----------------------|--------------------------------------------------------------------------|
| <b>Lead time</b>     | Made to order. Ask us for the current lead time.                         |
| <b>Warranty</b>      | 1 year, as on all our machinery.                                         |
| <b>Installation</b>  | Installation supervision and commissioning available.                    |
| <b>Custom builds</b> | Capacity, motor power and dimensions matched to your plant and drawings. |

## HOW IT WORKS

---

### 01 Gravity Feed

Raw coal lumps up to 125 mm are delivered by conveyor and drop into the crushing chamber through the top hopper.

### 02 High-Speed Impact

The single disc rotates at speed. Six manganese steel hammers throw the coal against the liner plates and shatter it on contact.

### 03 Fine Discharge

The pulverised coal passes the grate bars below 2 mm and discharges onto the outgoing conveyor, ready for the oven or boiler.

## APPLICATIONS

---

|                       |                                                                             |
|-----------------------|-----------------------------------------------------------------------------|
| <b>Coke Ovens</b>     | Preparing the fine coal blend charged into stamp and top-charged batteries. |
| <b>Thermal Power</b>  | Consistent sub-2 mm fuel for fluidised bed combustion boilers.              |
| <b>Coal Washeries</b> | Reducing raw coal ahead of washing and blending.                            |

## COMMON QUESTIONS

---

### What is the output size?

The single disc crusher is calibrated to produce a fine output below 2 mm.

### What is the motor capacity?

An electrical motor between 80 H.P. and 120 H.P., depending on the tons per hour you need.

### Are the hammers replaceable?

Yes. The six manganese steel hammers are replaced through the side access door without dismantling the rotor.

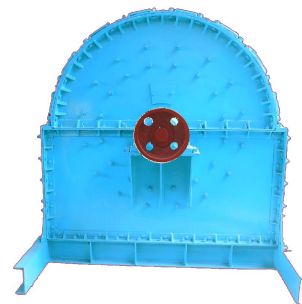

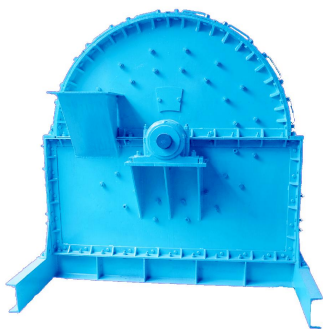

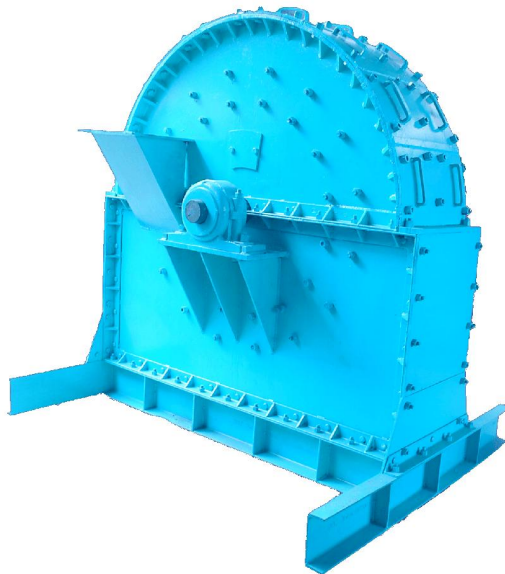

### What is the delivery time?

Made to order; fabrication usually takes 3 - 4 weeks depending on the production queue.

### What maintenance does it need?

Check the liner plates and grease the bearings routinely. Replace the hammers when worn.
