

MANUAL TOOLS COMPANY
Manufacturer of Coke Oven Machinery

PRODUCT BROCHURE

PUSHER MACHINE

With Roller Stamping Arrangement

65 – 70 HP

CONNECTED LOAD

20 m

PUSHER BEAM

11 m

MAX OVEN LENGTH

PUSHER MACHINE

A rail-mounted pusher machine for stamp-charged coke ovens. It combines a 20-metre pusher beam (40 HP drive) with a roller stamping system for uniform coal cake density.

20 Meters

BEAM LENGTH

40 HP (Elec.)

MAIN MOTOR

15 HP Motor

LONG TRAVEL

Roller Stamping

SYSTEM

SPECIFICATIONS

Main Pusher Motor	40 H.P.
Long Travel Motor	15 H.P.
Stamping Drive	7.5 H.P.
Total Connected Load	Approx. 65 – 70 H.P.
Pusher Beam	20 m (Heavy Fabrication)
Leveller Beam	20 m (Rack & Pinion)

DESIGN & DURABILITY

- Helical gearbox and chain drive
- Rack and pinion leveller beam
- Suits ovens up to 11 m long
- Rail-mounted travel along the battery

BUYING INFORMATION

Lead time: Made to order. Ask us for the current lead time.

Warranty: 1 year, as on all our machinery.

Installation: Installation supervision and commissioning available.

Custom builds: Capacity, motor power and dimensions matched to your plant and drawings.

HOW IT WORKS

01 Coal Stamping

Coal fines are fed in and the roller stamping system compacts them into a high-density cake.

02 Charging

The machine travels on rails along the battery and aligns with the oven.

03 Coke Ejection

After carbonisation, the pusher beam rams the finished coke mass out of the oven.

APPLICATIONS

Coke Ovens	Stamp-charged horizontal coke ovens.
Steel Plants	Producing high-density metallurgical coke for blast furnaces.
Coal Carbonisation	Consistent coal cake density for uniform carbonisation.

COMMON QUESTIONS

What is the maximum oven size?

The standard 20-metre beam suits ovens up to 11 metres long. Custom lengths are available.

Why roller stamping?

It is faster and needs less maintenance than drop-hammer systems, with continuous compaction.

What is the power requirement?

About 65 – 70 HP connected load (40 HP main + 15 HP travel + 7.5 HP stamping + auxiliaries).

Is the operation automated?

Semi-automatic: travel and alignment are motorised, stamping and pushing are panel-controlled.

Does it include the charging box?

It is usually part of the oven structure, but we can fabricate a mobile charging box if required.
