HAULAGE MACHINE

10 HP / 10 TON - COKE OVEN EXTRACTION SERIES

KEY CAPABILITY:

A heavy-duty haulage machine for coke ovens and mines. A 10 HP motor drives a high-torque worm reducer gearbox for steady, controlled pulling of up to 10 tons.

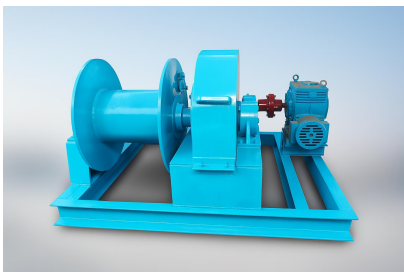

PERFORMANCE

- ✓ Pulling Capacity: 10 Tons (Horizontal)
- ✓ Motor: 10 H.P. (3-Phase, 440V)
- ✓ Gearbox: Heavy Duty Worm Reducer
- ✓ Application: Coke Oven / Mining

DURABILITY & DESIGN

- ✓ Cast Steel Gears (Machine Cut)
- ✓ Fabricated C-Channel Steel Base Frame
- ✓ Manual / Electro-Hydraulic Thruster Brake (Optional)
- ✓ Non-reversible worm drive resists back-slip

HOW IT WORKS

1. Electrical Input

The 10 HP motor starts; a flexible coupling transmits power to the gearbox input shaft and absorbs start-up shock.

2. Speed Reduction

The worm reducer lowers the RPM and multiplies torque. The non-reversible gear action helps prevent load back-slip.

3. Drum Traction

The output shaft turns the rope drum, coiling the steel wire rope and applying a steady 10-ton pull on the connected load.

APPLICATIONS

Coke Ovens	Extracting heavy coke cakes and operating heavy door mechanisms.
Rail Shunting	Moving wagons or material trolleys where locomotives cannot reach.
Underground Mines	Pulling tubs of coal or minerals up inclined planes.

COMMON QUESTIONS

Q. What is the maximum pulling capacity?

A. This model is rated for 10 Tons of horizontal pulling force.

Q. Can it be used for lifting?

A. No. It is designed for horizontal pulling or inclined dragging, not as a vertical lifting hoist.

Q. What oil does the gearbox need?

A. Heavy-duty gear oil such as Servo Mesh SP 320 or SAE 140, depending on ambient temperature.

Q. Does it come with wire rope?

A. The machine is supplied with the drum. Wire rope length and diameter are customised to your requirement.

Q. Is the motor included?

A. Yes, the standard unit comes with a 10 HP electric motor pre-mounted and aligned.
