VIBRATOR SCREEN MACHINE

MULTI-DECK SERIES - INDUSTRIAL GRADING & SORTING

KEY CAPABILITY:

A heavy-duty vibrating screen for coke and coal. An eccentric shaft gives strong vibration and high screening efficiency, in 1 to 4 deck configurations.

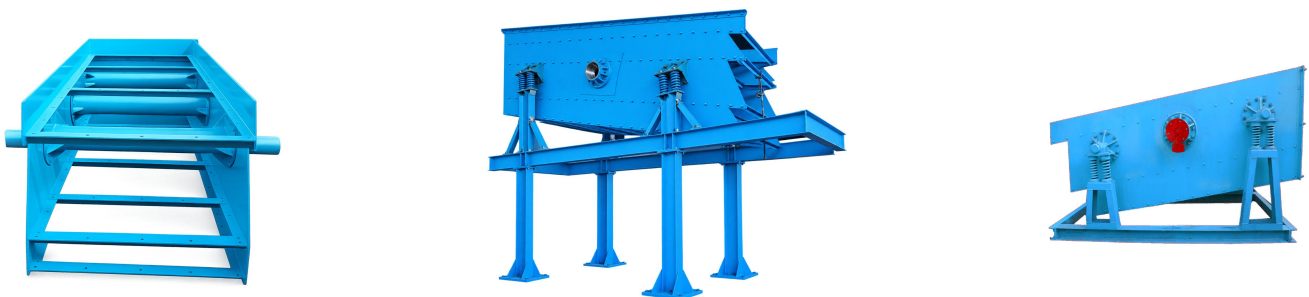

CONFIGURATION

- ✓ Decks: 1, 2, 3 or 4 (Customisable)
- ✓ Screen Sizes: 4'x12', 4'x16', 5'x16'
- ✓ Motor: 7.5 - 15 HP (Based on Load)
- ✓ Mesh: High Carbon Steel

DESIGN

- ✓ Eccentric Shaft Vibration Mechanism
- ✓ Heavy Coil Spring Suspension
- ✓ Interchangeable Mesh Decks
- ✓ Adjustable Amplitude (Counterweights)

HOW IT WORKS

1. Material Feed

Mixed material is fed onto the top deck and spread across the full width of the screen cloth.

2. Stratification

Fines pass through the mesh to lower decks while oversize lumps ride over the top to the discharge chute.

3. Multi-Output

Each deck discharges its own size grade (e.g. +40mm, 20-40mm, -20mm) to separate hoppers or conveyors.

APPLICATIONS

Coke Oven Plants	Separating coke breeze from usable blast furnace coke lumps.
Coal Washeries	Sizing raw coal before washing and dewatering clean coal.
Stone Crushing	Grading aggregates, gravel and sand.

COMMON QUESTIONS

Q. What materials can it handle?

A. Mainly coke, coal and iron ore; also stone aggregates and other minerals.

Q. Can I change the output size?

A. Yes. The wire mesh screens are interchangeable with different aperture sizes.

Q. How many sizes can I get at once?

A. A 3-deck machine gives 4 output sizes (oversize + 3 grades).

Q. What motor does it use?

A. Typically a 1440 RPM, 3-phase induction motor from 7.5 HP to 15 HP.

Q. Is the vibration adjustable?

A. Yes, by changing the counterweights on the flywheels / eccentric shaft.
