

MANUAL TOOLS COMPANY
Manufacturer of Coke Oven Machinery

PRODUCT BROCHURE

COKE CUTTER MACHINE

Double Drive, Drum Type – Industrial Series

12 – 15 TPH

BREAKING CAPACITY

20 HP × 2

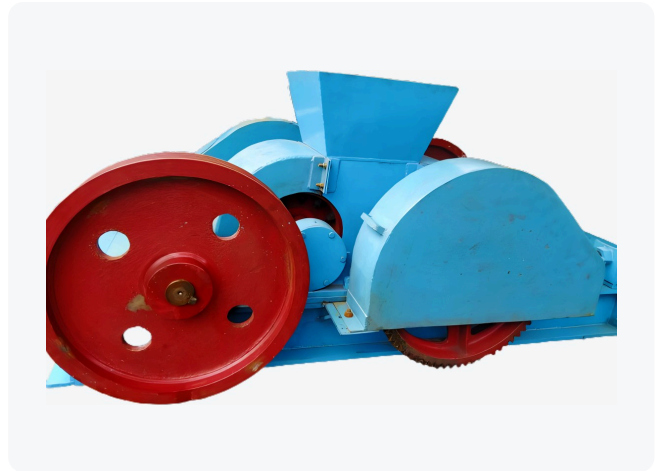

DOUBLE DRIVE

40 – 60 mm

OUTPUT SIZE

COKE CUTTER MACHINE

A double drive coke cutter built for torque. Two 20 HP motors drive cast steel gears on both ends of the cutting drums, and the adjustable drum distance holds output between 40 mm and 60 mm. Manganese steel liner teeth take the wear and are replaceable.

12 – 15 TPH
CAPACITY

20 HP × 2 (Dual)
MOTOR POWER

40 – 60 mm
OUTPUT SIZE

Up to 200mm
MAX FEED SIZE

SPECIFICATIONS

Breaking Capacity	12 – 15 Tons / Hour
Motor	20 H.P. × 2 (Double Drive)
Input Feed Size	Below 200 mm
Output Size	40 – 60 mm
Drum Adjustment	Up to 30 mm
Teeth	Manganese Steel Liner

DESIGN & DURABILITY

- Manganese steel liner teeth, replaceable
- Cast steel gears on both sides
- Adjustable drum distance up to 30 mm
- Double drive system prevents jamming

BUYING INFORMATION

Lead time: Made to order. Ask us for the current lead time.

Warranty: 1 year, as on all our machinery.

Installation: Installation supervision and commissioning available.

Custom builds: Capacity, motor power and dimensions can be matched to your plant and drawings.

Brochure: Download PDF

HOW IT WORKS

01 Material Feed

Coke lumps up to 200 mm are delivered by the upper conveyor belt directly into the intake hopper.

02 Double Drive Cutting

The dual 20 HP motors power the cutting drums from both ends, breaking the material down without jamming.

03 Sized Output

Uniformly sized coke, 40 – 60 mm, discharges onto the lower conveyor belt for immediate transport.

APPLICATIONS

Steel Plants	Sizing metallurgical coke for blast furnace charging.
Cupola Furnaces	Consistent coke sizes for foundry melting rates.
Coke Oven Plants	Cutting oven-discharged coke to customer grades.

COMMON QUESTIONS

What is the advantage of the Double Drive system?

20 HP motors on both sides give balanced torque and consistent power, preventing jamming and cutting hard coke lumps uniformly.

Can I adjust the output size?

Yes. The adjustable drum distance lets you tune the finished coke size between 40 mm and 60 mm.

What is the maximum feed size?

This heavy-duty cutter accepts coke lumps up to 200 mm.

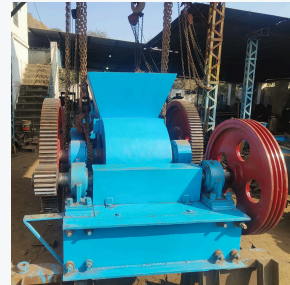

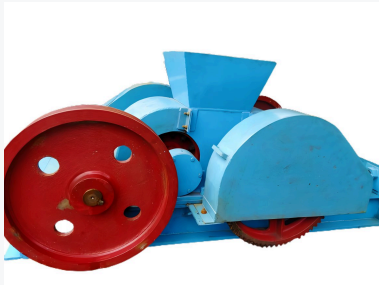

How durable are the cutting teeth?

High-grade manganese steel liner teeth, wear-resistant and fully replaceable.

What is the delivery timeline?

Made to order; fabrication usually takes 4 – 5 weeks depending on the production queue.
